

Filming at Night (unsociable hours)

To create a positive filming environment in residential & commercial areas requires effective consultation and planning with all residents/businesses that will be directly affected by the activity.

We recommend that you take note of the following guidelines for filming in residential areas at night/unsociable hours:

GUIDELINES:

- A permit application should be made to Screen Manchester detailing the scenes/action to be shot along with the requested filming equipment to be present on site.
- There is an 11pm (2300hrs) curfew for filming. If this needs to be extended, then each request is judged on its individual merit and based on detailed resident consultation & agreement.
- There will be a letter drop to residents in the area confirming the requested filming to take place (copy to be sent to Screen Manchester for circulation to key MCC depts, GMP and other key stakeholders), which provides a contact on the production for residents to contact to obtain more information.
- Where generators are used they should be silenced.
- Lighting systems used shall be set up so that light is not obtrusive into residential properties. There should not be any light glare from lighting into residential properties (especially bedrooms) and procedures shall be put into place to minimise light spill from the filming.
- Radio communication between crew should be carried out via earpiece equipment
- Crew should be reminded to respect the local community and where possible staff amenities and meeting places shall be sited away from residential properties.
- The moving of technical vehicles should be done in a respectful manner and depending on the requested wrap time some technical vehicles may be asked to remain on site until the following morning (7.30am/0730hrs).
